

Arjun Mehta

DevOps / Cloud Infrastructure Engineer

arjun.mehta.ops@email.com | +91-98XXXXXXX | Bengaluru, India | linkedin.com/in/arjunmehta-devops | github.com/arjunmehta

SUMMARY

DevOps engineer with 5+ years of experience designing and maintaining cloud infrastructure and CI/CD pipelines on AWS. Specialized in containerization, orchestration, and automating deployment workflows to improve release velocity and system reliability.

TECHNICAL SKILLS

Cloud: AWS (EC2, S3, IAM, VPC, RDS, CloudWatch)

Containers & Orchestration: Docker, Kubernetes

CI/CD: Jenkins

Practices: DevOps, Infrastructure as Code, monitoring & alerting

PROFESSIONAL EXPERIENCE

DevOps Engineer — CloudScale Systems

Bengaluru, India | March 2021 – Present

- Managed production infrastructure on **AWS**, supporting 99.9% uptime across multiple services.
- Migrated monolithic applications to **Docker** containers orchestrated with **Kubernetes**, cutting deployment time by 60%.
- Built and maintained CI/CD pipelines in **Jenkins**, enabling automated testing and daily production releases.
- Championed **DevOps** best practices across teams, including infrastructure-as-code and automated rollback strategies.
- Set up centralized logging and monitoring using AWS CloudWatch, reducing incident response time by 40%.

Systems Engineer — DataForge Solutions

Bengaluru, India | January 2019 – February 2021

- Administered on-premise and **AWS**-hosted servers for internal and client-facing applications.
- Containerized legacy applications using **Docker**, simplifying environment setup for developers.
- Configured **Jenkins** pipelines for automated builds and integration testing.
- Supported early adoption of **Kubernetes** for a pilot microservices project.

PROJECTS

Kubernetes Cluster Autoscaling

- Designed a self-healing Kubernetes cluster on AWS EKS with horizontal pod autoscaling.
- Reduced infrastructure costs by 25% through right-sizing and spot instance usage.

CI/CD Pipeline Overhaul

- Rebuilt a legacy deployment process using Jenkins, Docker, and automated AWS deployments.
- Reduced average deployment time from 45 minutes to 8 minutes.

EDUCATION

B.E. in Information Technology

Visvesvaraya Technological University — 2015 – 2019

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate
- Certified Kubernetes Administrator (CKA)
