

Riya Sharma

Full-Stack Web Developer

riya.sharma.dev@email.com | +91-98XXXXXXX | Pune, India | linkedin.com/in/riyasharma-dev | github.com/riyasharma

SUMMARY

Full-stack developer with 4+ years of experience building responsive, data-driven web applications. Skilled in modern JavaScript frameworks, backend scripting with Python, and relational database design. Comfortable owning features end-to-end, from UI to API to database.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL

Frontend: React, HTML, CSS

Other: REST API design, Git, Agile/Scrum

PROFESSIONAL EXPERIENCE

Software Engineer — Bright Labs Technologies

Pune, India | June 2022 – Present

- Built and maintained customer-facing dashboards using **React**, **HTML**, and **CSS**, improving page load speed by 35%.
- Developed backend services and automation scripts in **Python**, reducing manual reporting effort by 20 hours/month.
- Designed and optimized **SQL** queries and schemas for a PostgreSQL database handling 2M+ records.
- Collaborated with product and design teams in two-week sprints to ship 15+ features over 18 months.

Junior Web Developer — Nimbus Softworks

Pune, India | July 2020 – May 2022

- Implemented reusable **React** components used across 5 internal product modules.
- Wrote **JavaScript** utilities for form validation and dynamic UI rendering.
- Assisted senior engineers in migrating a legacy PHP site to a modern **React**-based frontend.

PROJECTS

Expense Tracker Web App

- Built with React (frontend), Python/Flask (backend), and SQL (data storage).
- Implemented user authentication, budget visualizations, and CSV export.

Recipe Finder

- Single-page app using React and a public REST API.
- Styled with custom CSS for a mobile-first responsive layout.

EDUCATION

B.Tech in Computer Science

Savitribai Phule Pune University — 2016 – 2020

CERTIFICATIONS

- Meta Front-End Developer Professional Certificate
- Python for Data Science (self-paced, Coursera)
